Student support and guidance .....	10
Quality evaluation and enhancement.....	11
After graduation.....	12

## Important information regarding the Programme Specification

### About this document

**Last revised** 15 June 2018

The Programme Specification gives a broad outline of the structure and content of the programme, the entry level qualifications, as well as the learning outcomes students will achieve as they progress. Some of the information referred to in this programme specification is included in more detail on the University of London website. Where this is the case, links to the relevant webpage are included.

Where links to external organisations are provided, the University of London is not responsible for their content and does not recommend nor necessarily agree with opinions expressed and services provided at those sites.

If you have a query about any of the programme information provided, whether here or on the website, registered students should use the *Ask a question* tab in the [student portal](#); otherwise the *Contact Us* button on each webpage should be used.

### Terminology

The following language is specific to the Global Health Policy programmes:

**Modules:** Individual units of the programme are called modules. Each module is a self-contained, formally structured learning experience with a coherent and explicit set of learning outcomes and assessment criteria.

### Key revisions made

Programme specifications are reviewed annually. The Senate Postgraduate Teaching Committee quality committee of the London School of Hygiene & Tropical Medicine (LSHTM), as part of its annual review of standards, confirms the programme structure and the educational aims and learning outcomes, and advises on any development in student support.

Any changes which may impact on continuing students are listed below. For all new students, the programme and general information provided in this document is correct and accurate and will be applicable for the current year.

### Significant changes made to the programme specification 2018-2019:

#### New modules

- GHM203 Research Design and Methods for the Analysis of Global Health Policy
- GHM204 Law and Global Health Policy
- From 2018-2019, students studying module CTM203 will no longer be assessed by a written examination and an assessed assignment. Instead, students will be required to submit two assessed assignments for the module.

## Title and name of awards

### Programme name

Global Health Policy

### Award titles

Students are registered on one of the following:

- Master of Science Global Health Policy (MSc)
- Postgraduate Diploma Global Health Policy (PGDip)
- Postgraduate Certificate Global Health Policy (PGCert)

### Exit awards

- Postgraduate Diploma Global Health Policy (PGDip)
- Postgraduate Certificate Global Health Policy (PGCert)

### Individual modules

There is also provision for individual modules to be studied on a stand-alone basis.

### Level of the programmes

The Framework for Higher Education Qualifications in England, Wales and Northern Ireland (FHEQ) forms part of the UK Quality Code for Higher Education of the [Quality Assurance Agency for Higher Education](#) (QAA).

The awards are placed at the following Levels of the Framework for Higher Education Qualifications (FHEQ)

- |                               |         |
|-------------------------------|---------|
| • MSc Global Health Policy    | Level 7 |
| • PGDip Global Health Policy  | Level 7 |
| • PGCert Global Health Policy | Level 7 |

Individual modules are offered at Level 7.

### Relevant QAA subject benchmarks

Not applicable

### Awarding body

University of London

### Registering bodies

University of London and London School of Hygiene & Tropical Medicine  
[www.london.ac.uk](http://www.london.ac.uk);  
[www.lshtm.ac.uk](http://www.lshtm.ac.uk)

### Academic direction

London School of Hygiene & Tropical Medicine (LSHTM)

### Accreditation by professional or statutory body

Not applicable

### Language of study and assessment

English

### Mode of study

Flexible and online study

### Blended learning

Students may also be permitted to study up to two elective modules by blended learning in place of distance learning modules. Blended learning enables a student to combine distance learning with a period of part-time study at the London School of Hygiene & Tropical Medicine. An additional fee will be payable.

More details about blended learning can be found in the [Programme Regulations](#).

### Programme structures

The **MSc Global Health Policy** consists of:

- Four compulsory GHM1 modules; and  
either
- Five elective modules selected from a list of options and a Project Report;
- or
- Eight elective modules selected from a list of options.

The **PGDip Global Health Policy** consists of:

- Four compulsory GHM1 modules; and
- Four elective modules selected from a list of options.

The **PGCert Global Health Policy** consists of:

- Four compulsory GHM1 modules.

### Individual modules

A selection of modules are available to be studied on an individual basis. You may take as many modules as you wish without registering for an award within the Global Health Policy programme.

Full details of the modules available are included in the [Programme Regulations](#).

## Exit awards

Students who for academic or personal reasons are unable to complete the 180 credits required for the MSc award, or the 120 credits for the PGDip award may exit with the successful completion of 120 or 60 credits and be awarded a PGDip or PGCert respectively, provided they fulfil the relevant criteria. Exit awards are granted at the discretion of the Board of Examiners and once a student has accepted an exit award they will not be permitted to continue their study of the same award with the University of London, unless they return the exit award prior to continuing their studies.

Full details of the Scheme of Award are included in the [Programme Regulations](#).

## Maximum and minimum periods of registration

The maximum and minimum periods of registration, from a student's effective date of registration, are:

	Minimum	Maximum
<b>MSc Global Health Policy</b>	Two years	Five years
<b>PGDip Global Health Policy</b>	Two years	Five years
<b>PGCert Global Health Policy</b>	One year	Five years
<b>Credit bearing individual modules</b>	One year	Two years

Study materials are made available after registration and payment of the applicable fee for the start of the academic year.

## Credit value of modules

Further information about the credit systems used by universities in the UK and Europe is available in:

The Higher Education Credit Framework for England,  
[www.qaa.ac.uk/en/Publications/Documents/Academic-Credit-Framework.pdf](http://www.qaa.ac.uk/en/Publications/Documents/Academic-Credit-Framework.pdf)

The Framework for Higher Education Qualifications in England,  
[www.qaa.ac.uk/en/Publications/Documents/Framework-Higher-Education-Qualifications-08.pdf](http://www.qaa.ac.uk/en/Publications/Documents/Framework-Higher-Education-Qualifications-08.pdf)

The European Credit Transfer and Accumulation System (ECTS),  
[http://ec.europa.eu/education/tools/ects\\_en.htm](http://ec.europa.eu/education/tools/ects_en.htm)

Where credits are assigned to each module of a programme, credit indicates the amount of learning carried out in terms of the notional number of study hours needed, and the specified Framework for Higher Education Qualifications in England (FHEQ) credit level indicates the depth, complexity and intellectual demand of learning involved. The details below indicate the UK credits and the European Credit Transfer and Accumulation System (ECTS) values.

For the Global Health Policy programme, credits are assigned to the modules as follows:

- 15 UK credits for each compulsory and elective module;
- 45 UK credits for the project.

Each award equates to the following number of credits:

- MSc Global Health Policy - 180 UK credits or 90 ECTS credits
- PGDip Global Health Policy - 120 UK credits or 60 ECTS credits
- PGCert Global Health Policy - 60 UK credits or 30 ECTS credits

One UK credit equates to a notional ten hours of study.

## **Recognition of Prior Learning**

This programme allows for recognition of prior learning.

Details on [how to apply for recognition of prior learning](#) can be found on our website – please see the [General Regulations](#) (Section 3) and [Programme Regulations](#) for further information.

---

## **Entrance requirements**

### **Postgraduate entrance requirements**

Full details of entrance requirements are provided on the University of London website under the [Requirements](#) section.

Applicants must submit an application in line with the procedures and deadlines set out on the University of London [website](#).

### **English language requirements**

Applicants must satisfy the English language requirements for the programme.

Where an applicant does not meet the prescribed English language proficiency requirements but believes that they can demonstrate the requisite proficiency for admission the University may, at its discretion, consider the application.

Detailed information on the [English language](#) requirement tests are given on the LSHTM website.

### **Computer and Internet access requirements**

Students will require regular access to a computer (or mobile device\*) with an internet connection to use the University of London website and the Student Portal to access the LSHTM's online learning site where many of the programme's study resources are located.

The computer should have at least the following minimum specification:

- a web browser (Firefox is recommended). This must accept cookies and have JavaScript enabled;
- a CD/DVD-ROM drive;
- screen resolution of 1024 x 768 or greater;
- sufficient internet bandwidth to enable downloading of essential learning materials that are up to approximately 50MB in size.

and the following software:

- MS Word (version compatible with .doc and .docx);

- MS Excel;
- a pdf reader (e.g. Adobe Acrobat).

\* Please note: full mobile access is not available for all modules.

### Additional requirements

- Students may need to use a calculator.
- A headset/microphone may be required to participate in live webinar sessions online.

### Students with access requirements

The University of London welcomes applications from disabled students and/or those who have access requirements. The University will make every effort to provide reasonable adjustments to enable those with a disability, learning difficulty or access requirements to have the same opportunity as all other students to successfully complete their studies.

The University is committed to managing the application procedure and the programme itself to ensure that services are accessible for all students and that an inclusive environment is created. Students with a disability or others who may need special arrangements to assist in taking examinations (such as separate room or special aids) should complete the relevant section of the application form, or contact the [Inclusive Practice Manager](#). Requests are considered by a University panel, whose purpose is to ensure that students with disabilities and/or access requirements are neither advantaged nor disadvantaged by such arrangements when compared with other students. These considerations remain separate from the academic selection processes.

For further information, see the [Inclusive Practice Policy](#).

### Sources of funding and scholarships

Information about potential sources of funding and scholarships is updated annually and where available is included in the prospectus web pages.

For information, please see: <http://www.lshtm.ac.uk/study/funding/> and <https://london.ac.uk/applications/funding-your-study>

## Educational aims and learning outcomes of the programmes

These programmes aim to offer a challenging, flexible scheme of study invigorated by research, which provides students with the knowledge and skills to engage in planning and decision making to improve the health of populations at global and national levels. This involves understanding the range of actors and institutions influencing global health arenas, the nature of health threats from changes in the global landscape, and in-depth understanding of additional health-specific topics with global relevance.

These programmes are primarily aimed at professionals who may already be involved in health planning or promotion at local, national, or international levels; but they also welcome undergraduate students with relevant degrees who are working with or planning to work for international agencies with concerns of health and development; or students working with, or studying the range of global actors influential in health decision making. LSHTM's Global Health Policy programme is a rigorous educational programme for professionals and

students who wish to use academic study to deepen their understanding of and increase their potential for career development in agencies engaged with global health problems, or alternatively to progress to a higher research degree in a field related to public health, global policy, or related areas.

The programmes aim to:

- develop knowledge and understanding of core economics and politics concepts affecting global health;
- enable students to understand key global health challenges;
- encourage independent critical thinking and the development of analytical skills that can be used to apply concepts to practical challenges and evaluate problems facing global health policy making.

The learning outcomes of the programmes are as follows:

### **Knowledge, understanding, intellectual and cognitive**

Students will be able to:

- demonstrate knowledge and understanding of basic concepts of economics and politics/political science in relation to their application to global health issues;
- understand the global nature of the health threats and challenges posed by environmental change and issues;
- demonstrate knowledge of a range of key global health issues;
- demonstrate the ability to analyse and critically discuss complex policy questions;
- apply understanding of the core disciplines of economics, politics, and political economy to real world global health policy debates and challenges;

**MSc students** who have selected the Project Report option will:

- carry out supervised independent research and produce a well-researched, well-structured, well-written, and clearly argued report.

---

## **Learning, teaching and assessment strategies**

The programme is delivered using a variety of study resources including lecture notes and slides, audio and video recordings, a selection of essential and recommended readings and activities. In addition to these, students taking GHM1 and GHM2 modules will receive a CD-ROM, containing a copy of all lecture notes and slides and some of the activities.

Each session would usually contain:

- Aim of the session;
- Learning objectives;
- A summary of key terms;
- Lecture notes and slides (or textbook chapter) – with the content of the learning material;
- Activities to evaluate and further students' understanding and skills and assess what they have learnt, often spaced within the lectures;

- Self-assessed activities - correct/optimal answers for these are provided and students are invited to discuss them on the session discussion forums; and
- Summary containing the key learning points of the session.

All essential and some recommended readings are provided for each module in a designated area of the VLE – Online Readings for Course (ORC). Essential readings are a key part of the study materials, while recommended readings are provided for further reference and research.

Students are encouraged to communicate with tutors and fellow students via the VLE web-based discussion forums. In this way, students can ask questions, engage in dialogue, and develop and negotiate conclusions with others, which are key components in the acquisition of knowledge, understanding and transferable skills. Students are also invited to participate in real time webinars or listen to recordings of these.

Advice and practical information such as study techniques, planning and preparation for assessment is available in the LSHTM programme-specific Student Handbook, available to students after registration on the GHM Student Zone on Moodle and the [Academic Writing Handbook](#). Students manage their own learning and study schedule, but advice can be sought from the support team at any stage of the academic year

Student learning will be evaluated by a range of methods, including formative assignments, assessed assignments and unseen written examinations.

Formative Assignments (FA) are available for the students to complete in some GHM1 modules. These do not count towards the final award but students are strongly encouraged to do these. FAs give students an opportunity to (i) apply subject-specific knowledge and skills, allowing them to review their progress and understanding, (ii) highlight to tutors any difficulties relating to the study materials, and (iii) receive personal tutorial feedback on their work and any highlighted issues.

Some modules are partially assessed by a written assessed assignment (AA). The AA gives students an opportunity to explore issues in depth, encouraging independent thinking and judgement, as well as to apply knowledge and skills taught in the module in a practical way that sometimes reflects a real-life scenario. Some assessed assignments may involve group work.

Unseen written examinations are held in June each year and consist of questions structured to allow students to demonstrate that they have acquired appropriate knowledge and understanding of the material, as well as critical, analytical and independent thinking skills. The way that students manage data, solve problems, evaluate ideas and the organisational skills they use to structure answers allows for further assessment of the standard of their intellectual and transferable skills.

MSc students are also strongly encouraged to produce a Project Report. This allows students to apply theoretical concepts and demonstrate analytical skills developed in the course of the programme. Students will be able to apply knowledge from both core and elective modules to a global health policy-related topic of their choice, reviewing what is known about the subject, and using various research methods to answer key questions about a gap in knowledge or critical issue.

## Assessment methods

Some GHM1 modules will be assessed solely by one two-hour unseen written examination. Some GHM1 and GHM2 modules will also be assessed by a written assessed assignment (in these modules the weighting between the examination and the assignment may vary). Some GHM2 modules will be assessed solely by assessed assignments (the weighting between these may vary). For further information on assessment for particular modules, please check the relevant [Module Specification Document](#).

The Project Report (MSc only) will be assessed by submission of one written report of between 7,000-10,000 words. It should be submitted in the final year of the degree.

The written examinations take place on one occasion each year, normally commencing in June. These are held at established centres worldwide.

## Individual modules

A student may choose whether or not to be formally assessed in the credit bearing individual modules for which they are registered. Students who choose to be formally assessed will be examined in the same way as students studying for a full award.

Full details of the dates of all examinations are available on the [website](#).

## Student support and guidance

The following summarises the support and guidance available to students:

- University of London [Student Guide](#): This provides information which is common to all students and gives information about matters of importance from the start of a student's relationship with the University of London through to their graduation.
- [Programme Regulations](#)
- [The University of London Online Library](#): This provides access to a range of full-text, multidisciplinary databases where journal articles, book reviews and reports can be found.
- Senate House Library: Registered students may use the resources located within the University of London Senate House library
- Employability skills module – guidance on how to manage your career in the future, available through the VLE.
- A University of London email account and web area for personal information management.

### Support and guidance from LSHTM

- The LSHTM Virtual Learning Environment (Moodle). This gives online access to the main module materials (which may also be sent in hard copy, depending on the module), module discussion forums, information on assignments, links to essential and recommended readings (where available), past examination papers and examiner reports, and study skills' resources.
- [LSHTM online library](#) resources

- Distance Learning Office staff are available to offer help and advice on administrative matters. Student support staff will direct all other queries to the relevant person – e.g. programme directors or members of the teaching teams.
- Additional discussion forums are set up over the summer to assist students in choosing their elective modules.
- Each module has at least one Module Organiser (MO) and a team of tutors assigned to it. The tutor team provides academic support to those studying on specific modules, in the following ways:
  - assisting in interpreting and understanding the material presented by answering queries on the online discussion forums
  - grading and providing written feedback on assignments
  - offering real-time webinars in which students are encouraged to participate.
- A project supervisor works with students undertaking the project in the final year of the MSc.
- An LSHTM programme-specific Student Handbook, available on the GHM Student Zone on Moodle, provides guidance on all aspects of the programme. It includes background information about the programme, advice on getting started, studying as a distance learner and organising study time, a description of the resources and programme materials available and how to access them, networking and support issues, procedures for assessment and examinations (including programme deadlines).
- An online discussion forum Student Cafe and a dedicated Student Representative Forum is available in the GHP Student Zone, which is accessible to students only.
- Students are encouraged to introduce themselves in the GHM Student Zone and are welcome to share individual contact details through the Student Network Directory, in order to build up their own networks if they wish (for example, to organise study groups).

---

## **Quality evaluation and enhancement**

The University of London collaborates with the member institutions to deliver the University of London programmes. The policies, partnerships and systems are defined within the key documents: The Quality Framework, the [Quality Assurance Schedules](#), [Guidelines for Examinations](#), [General Regulations](#) and, for each programme, [programme specific regulations](#).

### **Parity of award standards**

Every programme of study is developed and approved by an academic institution of the University of London, or a consortium with representation by more than one academic institution to the same standards and requirements as would be applied in the institution/s concerned.

Learning materials are written and examinations are set and marked by academic staff who are required to apply the University's academic standards.

### **Review and evaluation mechanisms**

Procedures are in place to assure the standards of the award and the quality of the student experience, which include programme development, delivery, management, systematic monitoring and ongoing review and enhancement of all programmes. Improvements are made as necessary to ensure that systems remain effective and rigorous.

- Annual programme reports are produced for all programmes in order to review and enhance the provision and to plan ahead;
- Every year independent external examiners submit reports to confirm that the programmes have been assessed properly and meet the appropriate academic standards;
- Annual student information statistics are produced and are referenced in all systematic reporting within the University of London;
- Periodic programme reviews are carried out every 4-6 years to review how a programme has developed over time and to make sure that it remains current and up-to-date.

### **Student feedback mechanisms**

The Student Experience Survey, carried out every two years, collects feedback from the student body on a range of topics relating to the student lifecycle. The results are considered in a number of different ways, including by the Pro-Vice Chancellor, the programme team, principal committees and departments at the University of London responsible for the different aspects of the student experience. Once the findings have been considered in detail, responses are published from both the University of London and from the individual Programme Directors.

Additional survey activity may also be conducted from time to time through the student portal, by email or from the programme team.

VLEs also provide the opportunity for informal feedback and discussion.

An undergraduate and postgraduate student member is appointed by the University to the majority of committees through an annual appointment round. Some programmes also recruit student members at the programme level. Students are frequently invited to take part in quality review processes such as Periodic Programme Reviews, Programme approval, Thematic Reviews, MOOC review panels and ad hoc focus groups. Opportunities such as these are advertised through social media and on the website. More information can be found at <https://london.ac.uk/current-students/getting-involved>

---

## **After graduation**

### **Further study**

Successful completion of the programme may serve as preparation for students who wish to go on to take further study in the subject area.

### **Graduate employment routes**

The programmes will be relevant both for those wishing to move into health planning or promotion, particularly at national or international levels and for those who are planning to work for international agencies engaged with global health problems.

## The Alumni Network

Upon graduation, students automatically become members of the University of London Alumni Network, a diverse community of over 100,000 alumni in more than 180 countries. The Alumni Network can provide past students with lifelong links to the University of London and each other. Benefits include social and networking events, access to local groups, a bi-annual magazine, social networking groups, and the opportunity to become an Alumni Ambassador for the University of London.

The London School of Hygiene and Tropical Medicine also welcomes former students to its alumni association and this is free to join.
